

The Copper Queen Store.

January Bargains

Some January bargains worth while. Genuine reductions on present need merchandise, conservatively told of. The bargain might appear greater if we placed an exaggerated value on the goods told of below. For instance, the Shirt Waists at ninety cents might seem cheaper if we said they were worth \$1.50 or \$1.75 instead of \$1.25, their actual worth. As it is, the actual saving is 35c. on each waist, and an actual saving of 35c. is better than a supposed saving of 50c. or more. But to the reductions.

FLANNEL SHIRT WAISTS, reduced
from \$1.25 to 90c.

Red, navy and black flannel; trimmed with soutache braid, gilt buttons. We've told of these before, but so long as there are any left, the reduction is worth telling of often.

FLANNEL SHIRT WAISTS, reduced
from \$2.25 and \$2.50 to \$1.75.

Some new styles have been placed on sale at this price to take the place of those sold. If anything, the newer ones are even prettier than the first ones reduced.

FLANNEL WAISTS, reduced
from \$5.00 to \$3.75.

You may pick and choose from any Five Dollar Flannel Waist we have in stock—there are some very pretty ones—and on the purchase price you'll save \$1.25. Up to a few days ago they were \$5.00 each.

GIRL'S JACKETS at \$3.25 and \$4.25
that were priced at \$6.50.

These jackets are in large sizes mostly—for fourteen, sixteen and eighteen year old girls. Don't be deceived by the fair weather of yesterday and the day before. There'll be plenty of days yet this season when such jackets as these will be most welcome. Then think of the service they'll give next year. At \$3.25 and \$4.25 the jackets are indeed bargains.

TH. DELINEATOR for February is now on sale at the Dry Goods Department. The usual amount of interesting reading matter for women folks—and a hint of early spring styles. 15c. a copy.

NOW!

WHEN YOU COME TO THINK OF IT!

You ought to have a pair of new shoes, and if you will come up and see the new ones we just received straight from the factory, and the nice easy price that goes with them, you will certainly be wearing one of those glad smiles that you always wear when you have on a swell pair of shoes. And, by the way, don't forget that we have a dandy line of hats, too, as well as anything else in Gentlemen's Furnishings.

PUBLIC HALL.

Excavations Being Made at Douglas for the Library—Other News Items.

DOUGLAS, Dec. 10.

Special correspondence.

Last Wednesday laborers were put to work excavating for the new public hall and library building to be erected on 10th and F streets by Phelps, Dodge & Co. Work on this building will be pushed rapidly to completion, and will be used as a school house until more suitable quarters can be established.

Mr. Edward Coats desiring to retire from the saloon business, has advertised his business for sale or rent. Another new saloon building is in course of erection on South Sixth street.

The director of the United States mint, in his yearly report of precious metals for 1901, places Arizona sixth in the production of gold and sixth in that of silver.

The Fisher Bros. have started a new first class butcher shop, first door south of the Ord hotel.

Messrs. Williams & Norton, first-class mechanics from Prescott, have purchased lots in Douglas and are now putting up a building facing Seventh street.

M. C. Lewis, the carpenter, is finishing up his new carpenter shop and lodging house.

Douglas & Fetterley, of the Tolbee saloon, are building an annex to their place of business.

J. M. Sparks is the proprietor of a new two-story lodging house which is neatly and comfortably furnished.

H. C. Stillman, "mine host" of the Ord hotel at Douglas, was shaking hands with his numerous friends in Bisbee yesterday. The Ord hotel is the leading hotel of Douglas and under the popular management of Mr. Stillman is receiving a liberal and gratifying patronage.

Death of Frank Griffin

On Wednesday evening, at the county hospital in Tombstone, Frank W. Griffin departed this life. The deceased was an old newspaper man, and in his earlier days was associated with the metropolitan dailies in Chicago and St. Louis. Through adversity and misfortune he drifted to the west, and coupled with his uncontrollable appetite for strong drink and physical ailments he was not able to hold a position for long. At one time he was local reporter on the Star, and of late years was connected with the newspaper work in Cochise county.

His last assignment was court reporter for the REVIEW at the recent term in Cochise county.

He returned to Bisbee a few weeks ago, and after a protracted spree was attacked with pneumonia and was taken to the hospital in Tombstone and only lived two days.

Frank Griffin had many friends throughout the west and his newspaper work was of a high order. He was his own worst enemy, and his untimely demise was cause for sincere regret among those who knew him in this camp.

G. C. Lopez, of the Slinger Sewing Machine company, has gone to the City of Mexico on a pleasure trip. Mrs. Lopez is now in that city and will accompany her husband on his return to Bisbee.

Vic Hanney was in Bisbee on Wednesday. He expects to settle down here, with Phil Brannen, after his present trip, to end in a few days—Tucson Star.

H. J. Gient, teacher of penmanship, rapid calculating and card writing, desires a few more pupils to take instruction at their homes. Advancement guaranteed. See Card Writer. 10 2p

Have you ever heard any one who uses Schilling's Best baking powder say she thought some other might be better?

Arizona Appointments Confirmed by Senate

Washington, Jan. 10.—The Senate committee to-day decided on a favorable report on the confirmation of Miguel Otero for Governor of New Mexico and Daniels to be U. S. Marshal for Arizona. All of the Federal Judges for Arizona were confirmed with the exception of Judge Street of the First Judicial District. Charges had been filed against almost every Arizona appointee, but on investigation the Senate committee deemed them unworthy of consideration.

American Capital Revolutionizes Trade

New York, Jan. 10.—The first vessel of the Philippine Transportation and Construction company sailed from New York today for Manila by way of the Suez canal. The event not only marks the inauguration of a new monthly steamship service between this port and Manila, but is also the first real effort to make American trade felt in the new American possessions. The steamship carries to Manila the first installment of steam lighters, which the company has built at an average cost of \$28,000. In all nineteen lighters will be transported to Philippine waters. With these lighters the company purposes to revolutionize the conditions of commerce in the Philippine islands. Lighterage charges at Manila are now about \$4.50 (Mexican) per 100 pounds. With these new lighters the company intends to reduce the charges to 17 cents (Mexican) per 100 pounds. The company has already expended upwards of half a million dollars to do business, including general harbor, lighterage and inter-island business.

Van Sant Calls Extra Session.

St. Paul, January 10.—Governor Van Sant, of Minnesota, decided to call an extra session of the legislature to consider the railroad merger and the proposition made by the railroad by J. J. Hill, of the Great Northern.

Liberty Bell on Exhibition.

Charleston, S. C., Jan. 10.—The famous old Liberty bell was given a rousing welcome today upon its arrival here for exhibition at the exposition. It was conducted from the station to the exposition grounds by a procession comprising the city and exposition officials, state militiamen and representatives of various patriotic bodies. The famous relic was installed in the Philadelphia building, where it will be guarded day and night by Philadelphia policemen.

Railroads Reach Agreement.

Chicago, Ill., Jan. 10.—The agreement recently arrived at for the maintenance of rates on grain and provisions from Missouri river territory to the Gulf ports went into effect today. The agreement is in the nature of a partial settlement of the freight rate war which has existed for a long time past. The roads concerned are the Missouri Pacific, Denver and Rio Grande, Southern Pacific, Union Pacific and Burlington systems.

American Goods for Russia.

Philadelphia, Pa., Jan. 10.—The first large shipment of American harvesting machinery to southern Russia was made on the steamship Oshello, which sailed from Philadelphia today. It is the initial consignment in an order received by Chicago firms for 350 carloads of machinery, destined for the agricultural region bordering on the Black sea.

Bryan in Massachusetts.

Holyoke, Mass., Jan. 10.—William J. Bryan, lecturer, arrived here today and was given a cordial reception. Under the auspices of the local council of the Knights of Columbus he speaks at city hall tonight, taking as his subject "A Conquering Nation."

Canal Commission Convenes

Washington, Jan. 10.—Admiral Walker, chairman of the canal commission, called that body together to consider the explicit offer received today by cable from Paris offering to sell everything owned by the Panama Canal company for \$40,000,000.

Miss Stone Released.

London, Jan. 10.—According to a dispatch just received from Constantinople the release of Miss Stone from the brigands is now but a question of a few hours.

SPORTING PHOENICIANS

Organize A Racing and Fair Association.

Over in Phoenix the various horse owners and lovers of outdoor sport held a large and enthusiastic meeting at the Hotel Adams on Monday night which was attended by all the well known horsemen of the valley.

Vernon L. Clark, chairman of the meeting, appointed a committee consisting of Walter Bennett, W. B. Cleary and W. N. Tiffany to draft articles of incorporation of the Arizona Fair and Racing Association, which will be formed with a capital stock of \$50,000, divided into 500 shares of \$10 each. The object of the association will be to promote interest in outdoor sports, horse racing, etc., and to ultimately hold a territorial fair and make it an annual event.

A committee of ten was appointed to solicit subscription to the capital stock. This committee will go to work at once and it is hoped that lovers of good sport will subscribe freely to this project.

Chicago Germans Will Banquet Schley

Chicago, Jan. 10.—Admiral Schley, who will visit Chicago the last of the month, will be fettered a magnificent reception by the German. Societies numbering 5,000 men will parade and be reviewed by Admiral Schley at the Auditorium. This will be followed by a reception.

Decrease in German Exports

Berlin, Jan. 10.—Complete returns from all the consulates in Germany show that the total of German exports to the United States in the year 1901 amounted to \$94,616,731. This is a decrease of \$3,567,922 from the valuation of the same class of exports in 1900, and it is due entirely to the reduction of sugar exported to the United States. In 1901 this product was exported to a valuation of \$7,827,349, as against \$10,322,532 in 1900. The increase in merchandise other than sugar exported last year to the United States amounted to \$4,937,290.

American Heirss to Wed Prince.

Rome, Jan. 10.—Prince Victor, of Savoy, in direct line to the Italian throne, leaves this week for America. He recently visited the United States and it is understood he came back to secure for marriage to an American heiress. This has been secured. Prince Victor is very accomplished, and was sent from here a year or so ago to put an end to an unfortunate attachment.

Tammany and Croker

New York, Jan. 10.—Tammany hall holds its annual meeting tomorrow. Notwithstanding his stories of declining to longer lead the Democratic forces, it is generally understood that Richard Croker is to be re-elected to his old position as chairman of the principal committee.

Sale of West India Islands

Copenhagen, Jan. 10.—The Riksdag, or Danish parliament, reassembled today. The proceedings will be watched with close attention, as it is generally expected that action of some sort will be taken with regard to the proposed sale of the Danish West Indies to the United States.

Oldest Odd Fellow

Van Wert, Ohio, Jan. 10.—Samuel Saltzberger celebrated his 102d birthday today and was the recipient of many congratulations. He is said to be the oldest Odd Fellow in the United States.

New Postmaster General.

Washington, Jan. 10.—Payne the new postmaster general, will assume the duties of his office on next Tuesday. Postmaster General Smith returns to the editorship of the Philadelphia Times.

NEW CONVERTERS Are Being Installed at La Cananea

Estimated Production of Copper.

The New Store Building—A Bank to be Opened

Building in the Canaan has been greater during the last three months than during any other time since the camp was started. More machinery has been received and installed, and more new buildings have been completed than at any other time. Two new Mitchell furnaces have been put up and are running to their full capacity, and another will be ready to blow in on the 20th of this month. The furnace now in course of erection is 18 feet long by four feet wide, has a smelting capacity of 350 tons and is the largest furnace of the five in the Cananea smelter. The six stands for the new converters are being set in place, and will be ready for the converters in about three weeks. By the end of the present month the daily production of the Cananea smelters will be one hundred tons of fine copper per day.

The Cananea railroad has reached a point about one quarter of a mile from the smelter, and at the end of next week the track will be in the smelter yards and coke and coal will be unloaded direct from the cars into the bins. The first through freight train went into Cananea Monday evening and consisted of eleven cars loaded of lumber and three cars of machinery. Two engines are hauling freight into the new camp, working night and day, and the present yards will have to be enlarged to hold the freight that is being brought in.

The new store building of the Cananea Consolidated Copper company is nearly finished and will be occupied by the store department in about a week. The building is of brick and is two stories in height, having a frontage of 47 feet and 100 feet in depth. The fixtures of the store are the finest and costliest of any store in either Arizona or Sonora, and the cash carrier system will be the best of any store in the southwest. A cellar is used for storage purposes.

A bank will be opened in the company's offices and checks of the employees cashed, which will be a great accommodation to the men, who have to lose a small part of their earnings each month by having their checks discounted.

The company hotel is ready for the plastering and this work will be pushed as fast as possible, and the management hopes to have it ready for occupancy in February.

The new hospital building is a two story brick structure and is now up to the first story, and work is being pushed with vigor. The hospital will be fitted up with the latest improved appliances, and will be a model institution of its kind.

The company has just finished a reservoir for holding water to be used for domestic purposes. The water is brought from the Puertocitas mine, some eighteen miles away, and is gotten from mountain springs. The capacity of the tank is 40,000,000 gallons and is built of brick. A pipe line is being run to the different parts of the smelter and the town, and this will afford a good fire protection.

The present capacity of the company carpenter shop is too small to accommodate the work now going on, and an addition is being built which will enable that department to turn out more work.

The new stack used to carry off the sulphur fumes has been completed and is one of the largest of its kind in Mexico. It stands 208 feet and 3 inches from base to top, and is 12 feet and 6 inches in diameter.

The company boarding house has been enlarged by having two more rooms added, and still it is not able to accommodate all those employed in the different departments.

The new townsite is rapidly assuming a town-like appearance. Some thirty residences are now under course of construction, and with the arrival of material a building boom will be on in earnest. The company was the first to start a building and it is the public school house, which is conveniently located and will be two stories and built of brick.

A brick yard, with a patent dryer, is turning out brick in large numbers, and has orders enough ahead to run for a year or more. The majority of the buildings in the new town will be built of brick and adobe and finished in wood.

A stage line is run to the new townsite from Cananea and carries the living there back and forth to the work. Grading will commence as early date for the trolley line, which will connect the town with the works, and trips will be made every hour.

The REVIEW neglected to mention in the list of newly appointed councilmen the name of Peter Johnson, one of Bisbee's substantial citizens.

A Forced March Our Soldiers Victorious

Washington, Jan. 10.—Admiral Rogers, cables the navy department this morning from Manila, that Waller and his men have just finished a forced journey across Samar. The column suffered great hardships, but returned alive, and killed thirteen insurgents and captured a captain, lieutenant, and four men implicated in late treacherous murder of American soldiers. This is one of the hardest marches made by American soldiers in the Philippines and the column had been almost given up for lost.

INCORPORATION

Expressions of Leading Citizens

The New Council—What They Purpose to Do—Not Yet Officially Notified

Everybody who was seen yesterday regarding the incorporation of the city of Bisbee were smiling and generally expressed themselves thoroughly satisfied with the project. The general consensus of opinion was to the effect that Bisbee would be vastly improved and that every citizen would be benefited.

There has been a growing sentiment in favor of incorporation since last June, when a mass meeting was called for the purpose, and a committee was appointed for the purpose of furthering this end. There was, however, at that time a healthy opposition by many of the leading residents of the city, who not only withheld their support, but were entirely open in expressing their dissatisfaction. Today these same members, who six months ago opposed the idea of Bisbee becoming a body corporate, are today emphatically in favor of incorporation.

What the first benefits that we will receive at the hands of the new conditions will be it is yet too early to predict, but one of the evils that will be removed is certainly the unnecessary unsanitary condition. No one can pass up one of our thoroughfares in the business portion of the city without at once feeling that there is entirely too much neglect in the general cleanliness of the streets, while many of the side streets or alleys are evidently used as a dumping ground and every manner of filth is allowed to accumulate.

Besides this, the sidewalks will be kept up and not be permitted to become unsafe for those who pass over them. The jump-offs on the sidewalks at nearly every door in many places are traps.

But if the city secures a good and substantial supply of water, her citizens will be vastly benefited and repaid an hundred fold for any expenditures or special tax levy. This would not only be a boon to the people, who would have pure water at all times, but as well as a protection against fire that would very materially reduce the rate of insurance.

It was somewhat premature for any of the appointed city officers to express an opinion as to what he would do, as no member has been officially informed of his appointment, nor has he received the credentials of appointment from the board of supervisors. But all are uniform that certain things must be done. If any of the members had any particular thing on their minds they were silent. As to whom the members of the city council would select from among their number as mayor would be simply conjecture. Doubtless any one of them would do honor to the body.

The members of the first city council, as given to the readers of the REVIEW yesterday, are L. C. Shattuck, T. M. Shearer, J. B. Angius, Ed. Scott, James Letson, Otto Geisenhofer and Peter Johnson, all representative citizens, who will look at all times to the welfare of the city.

In speaking of the situation J. B. Angius, who was seen yesterday, said: "I am really sorry that the supervisors have seen fit to appoint me as a member of the council. But I am fully in sympathy with incorporation and will do what in my opinion ought to be done for the advancement of the city and the general improvement. I think the time for incorporation is ripe."

Upon being seen James Letson spoke freely regarding the advantages of incorporation. "Although I can say nothing regarding the policy of the council, or what we will do or be expected to do at first. I can say that I will be happy to see anything done for the general advancement of Bisbee. I was not in favor of incorporating the city six months ago, but I feel now that this is the best thing for us all." L. C. Shattuck was in a cheerful

frame of mind and said: "We want to do everything we can to benefit everybody. We can't say anything yet as to what we will do, for no one has thus far been presented with credentials and I don't know when we will have our first meeting. The other members of the council could not be seen, or said they could say nothing except in a general way."

Postmaster J. G. Pritchard expressed himself as highly pleased with the personnel of the Council. "I believe we will all be materially benefited by incorporation and I have no hesitation in saying that I have entire faith with the new council. I know them all as responsible and reliable men, who will unquestionably do their duty. I am well pleased."

S. W. Clawson, to whose untiring efforts was due in a large degree the success of incorporation, is enthusiastic over the result. "I believe the appointments by the Supervisors entirely safe and that the several members of the Council are good substantial, conservative men. They will do their duty and advocate the interests of all."

W. H. Brophy upon being seen was very enthusiastic over the results of incorporation. "Every body must be pleased over the result," replied Mr. Brophy. "We have been working upon this proposition for some months and are fortunate in the outcome. We will accomplish now what we could not do before and the general improvements will certainly be noticeable. The sanitary conditions will be one of the first things that the new Council will take up. We will all reap our share of the benefit and for one I am highly gratified."

Rev. H. Shields says: "Bisbee is raised from an unorganized body to the dignity of a city at a single leap. Everybody should congratulate himself upon this material change in affairs. Those who have opposed this measure hitherto cannot but help see later that nothing but good can result. The one thing that we need is a good system of water-works, for no one who has passed the summer in Bisbee can help noting this crying need. The sanitary conditions will be vastly improved. Although I do not know the entire body of the Council, I feel that those whom I have become acquainted with are substantial, conservative men, who know the interest of the city and will stand for improvement."

The history of Bisbee, primarily a mining town, is one that commands the admiration of her citizens. Less than a quarter of a century ago she was in her infancy—a small mining camp, hardly known beyond the gigantic mountains that shadow her present site. The old prospector, who led his burro up the gulch and kindled a fire to cook his coffee when the first location monument was built, little dreamed of the future of this camp. On every hand today there is evidence of material progress. The little mining cabin is replaced with beautiful and substantial buildings that would do credit to many larger cities. She has a population of some eight thousand souls and is the second city of the territory. New possibilities are now in store for her, since the advantages of incorporation are given.

Copper and Lead Unchanged

New York, Jan. 10.—Copper is still unchanged on the market today. There is no evidence of a decrease of 11 1/2. Lead unchanged. Silver 55 1/2.

Shaw Assumes Duty Feb. 1st

Washington, Jan. 10.—Shaw cannot take charge of the Treasury Department until the first of February and asks Gage to remain until then.

Pension Measure Reported

Washington, Jan. 10.—The House today spent the entire session considering the bill to make the census bureau permanent. The pension bill was reported to House and is six million less than last year.

More Troops for Africa

Halifax, N. S., Jan. 10.—The 900 mounted infantrymen recently recruited in the Dominion for service in South Africa sailed from Halifax today.
